

## RENU 28 Usage Guide and Support

Congratulations on choosing Renu 28 and bringing the healing power of redox molecules into your life.

### Before you start

- Take a before photo of any skin issues (loose skin, scars, wrinkles, sun damage, blemishes, stretch marks or any other skin issues). Pictures say a thousand words. We often don't notice the daily small changes; over time they become big changes. The before and after photo are important for you to see the value and will help you share the benefits.
- To be objective, give a rating out of 10 of any aches, pain or discomfort out of 10 of any areas you want to see a benefit in. Track your changes weekly.

### Using Renu 28

1. Always shake the tube before every use.
2. Apply on clean, dry skin at least twice a day. You can apply more often for increased benefits. You cannot use too much Renu 28!
3. Apply enough gel that it takes 30-60 seconds to rub in and dry on the affected area. *You can still apply your moisturizer or makeup after giving Renu 28 a couple of minutes to dry.*

**Everyone is different...use Renu 28 daily for at least 3 months to allow your body to experience results. We recommend using at least 1 tube / two weeks, more if you have discomfort.**

**The cellulite study results are based on using a tube a week on the hips, thighs and buttocks.**

### Where to use Renu 28

You can use Renu 28 on any skin problem anywhere on the body – remember this product is 100% non-toxic and has anti-bacterial, viral, fungal and microbial properties, yet increases cellular efficiency and function. It literally helps the cells function as though they are younger.

Use it on sore muscle, aches, pains & more...see what happens for yourself. Or, try it on muscles immediately after exercise – you may experience faster recovery and less muscle soreness. For more ideas check out 50 Ways to Use Renu 28 below.

To improve the absorption of the molecules into the body you can apply to the neck, inside wrists, back of knees and feet.

### What to expect

**Not another “face cream”. It's 90ml of skin-priming, age-fighting, cellular-rejuvenating gel for your whole body.** [Excellent presentation here](#)

Many people experience very quick results for minor aches and pains as shown in [the 3 in 5 demonstration](#). At peak efficiency skin cells 'Renu' themselves every 28 days. This can lengthen to up to 90 days with age. You might need to go through several renewal cycles before you see visible skin care results.

Some people see and feel results quickly; for others it can take several months. Give it a good trial, 3-4 months, more for problem areas. It has proven truly extraordinary for many, many people.

**Detoxification:** When first using ASEA Redox products some people may have detox experiences, including through the skin, as toxins and waste are flushed out of the cells. With the skin being the body's largest organ, it can detoxify the effects of environmental pollution, poor diets, and other skin care products. If you experience any detox remember that Renu 28 has earned Dermatest's coveted 5-star clinically tested seal, its highest possible commendation for safety and efficacy.:

- Drink plenty of water to flush toxins
- Continue using Renu 28 as the redox will support the detoxification process
- Try using exfoliant or clay mask once or twice weekly if you are experiencing rapid renewal of skin cells.

### Storing your Renu 28

While RENU 28 is stable, we do not recommend leaving it on a car in the hot sun! In the bathroom, your office and handbag is great ☺☺

# 50 WAYS TO USE

ASEA discovered a revolutionary technology that replicates the body's own redox signaling molecules, which protect, rejuvenate, and keep cells functioning at optimal levels. That means with RENU 28 Skin Revitalizing Gel, you can apply active redox signaling molecules directly onto your skin and improve your skin at the cellular level, revitalizing your skin's health—not just its appearance. The list below highlights 50 of the many ways RENU 28 can benefit your skin.

1. Reduce the appearance of wrinkles in wrinkle-prone areas such as on the face, neck, chest, and hands
2. Soothe skin irritation from the effects of the sun
3. Improve the elasticity of skin
4. Decrease redness in skin
5. Reduce the appearance of cellulite on legs and tummy
6. Soothe itchy or dry scalp
7. Clarify skin all over body
8. Minimize the appearance of dark spots
9. Normalize oily skin
10. Soothe feet after long workouts or time spent in tennis shoes
11. Tighten skin to give the feeling of having a face-lift
12. Soothe skin irritated by plants
13. Use as a whole-body skin moisturizer
14. Tighten the skin around the eyes
15. Smooth rough skin anywhere on the body
16. Smooth and reduce calluses on the heels and hands
17. Soothe and moisturize cracks in the heels
18. Improve blotchy skin
